Professional Summary

- Worked as a Software Engineer with 3 years of experience in Tata Consultancy Services as Salesforce Developer (2 years) and Administrator. **Available to join immediately.**
- Proficient in configuration items like Lightning Components, Flow builder, Rules and Security settings.
- Skilled in developing custom solutions including Triggers, Apex classes, Batchable, Queueable and Scheduled Apex to automate and optimize complex business workflows.

Work Experience

Tata Consultancy Services | Salesforce Developer & Administrator | 3 years

Project: OneTRO – Aug 2022 to Feb 2023

Technology: Salesforce, Apex Classes, Triggers, Flows, Security Settings.

Responsibilities:

- Developed Apex Triggers to automate risk scoring updates on control failures.
- Designed Flows to create remediation plans for high-severity risk events.
- Implemented Approval Process for risk acceptance, and mitigation plan reviews.
- Implemented field-level security and record-level sharing for role-based access.

Project: MedConnect – Feb 2023 to Sep 2024

Technology: Salesforce Lightning (LWC), Apex Classes, Triggers, Flows, Security Settings.

Responsibilities:

- Designed Flows for creating follow-up appointments and care plans on clinical visit data.
- Implemented Screen Flows for care coordinators to capture patient data.
- Created Apex triggers to enforce data integrity when linking patients.
- Developed Scheduled Apex to send appointment and medication reminders.
- Applied Custom Metadata Types and Custom Settings to manage configuration for rules.
- Developed custom LWC components to visualize patient journey stages.
- Customized Health Cloud data model for objects to suit project workflows.
- Worked with Health Cloud Console to improve usability for care coordinators and providers.

Project: MedConnect, Onelink – Sep 2024 to Aug 2025

Technology: SFDC, Sandboxes, PowerShell, Bash, Windows, Unix.

Responsibilities:

- Refreshed Salesforce sandboxes regularly to align metadata with production environments.
- Monitored debug logs, cleared cache, and validated application stability and performance.
- Created SOPs and deployment documents to support smooth change implementations.
- Ensured high application availability by continuously monitoring performance and system health.
- Automated maintenance and service recycles using Bash Scripting.
- Automated data extraction and reporting using PowerShell, reducing manual effort.

Skills Set

Languages:	HTML, CSS, JavaScript, Apex, SOQL, SOSL, Git, PowerShell, Bash.
