EXPERIENCE

Tata Consultancy Services – Salesforce Developer & Administrator | 3 years

Project: OneTRO

- Developed **Apex Triggers** to automate Risk scoring updates and mitigation plan.
- Designed Flows to create remediation plans for high-severity risk events.
- Implemented integration with external data source for server details.
- Worked on **LWC component** for auditors to act on compliance details.
- Implemented **Object model** for compliance and remediation of server data.

Project: MedConnect

- Designed **Flows** for creating follow-up appointments and care plans on clinical data.
- Implemented Screen Flows for care coordinators to capture patient data.
- Created Apex triggers to enforce data integrity when linking patients.
- Developed **Apex to integrate** the application to EHR, ERP and Pharmacy Applications.
- Applied **Custom Metadata** Types to manage configuration for rules.
- Worked with **Health Cloud** Console to improve usability for care coordinators.
- Developed custom LWC components to visualize patient journey stages.

Project: OneTRO, MedConnect, Onelink

- Refreshed **Sandboxes** regularly to align metadata with production environments.
- Monitored **Debug logs**, cleared cache, and validated application stability and performance.
- Debugging for Flows fault paths, and Integration issues with other applications.
- Customized Health Cloud model as per the changes of project requirement.
- Automated maintenance, reporting and service recycles using **Bash and PowerShell**.
